

R & T Notes

Ten Method Learning Tips

1. Relate the new method to what you already know.
2. Learn the structure of the method. Write out a complete lead or course change by change.
3. Learn the method in small bits to start with, then join the bits up.
4. Familiarise yourself with new types of work.
5. Learn where you pass the treble and where you work with it.
6. Learn the place bell order and **all** the starts.
7. Learn where you pass your course and after bells and where you work with them.
8. Learn the Bobs and Singles as part of the method.
9. Look for signposts, roll ups, familiar changes, back rounds.
10. Prepare at home and remember:

Proper preparation prevents poor performance
